Message

It gives me immense pleasure to learn that the Centre for River Affairs, South Asian Institute for Advanced Research & Development (SAIARD) is going to hold International Delta Summit on 16th and 17th June, 2023, focussing on the utility of River and River Delta in human life and livelihood. The contribution of river and its delta to development of human civilization is undeniable. But human activities detrimental to river and its delta are having an adverse effect on the ecosystem. So there should be an increase in human consciousness about protection of river and river delta in the interest of mankind.

Hope and trust that at the present moment the aforesaid summit will go a long way to raise awareness among the people about the usefulness of river and its delta, prompting them to care about protection of the parts of the environment.

I wish their endeavour all success.

(Javed Ahmed Khan)
Minister-in-Charge
