OUR MISSION

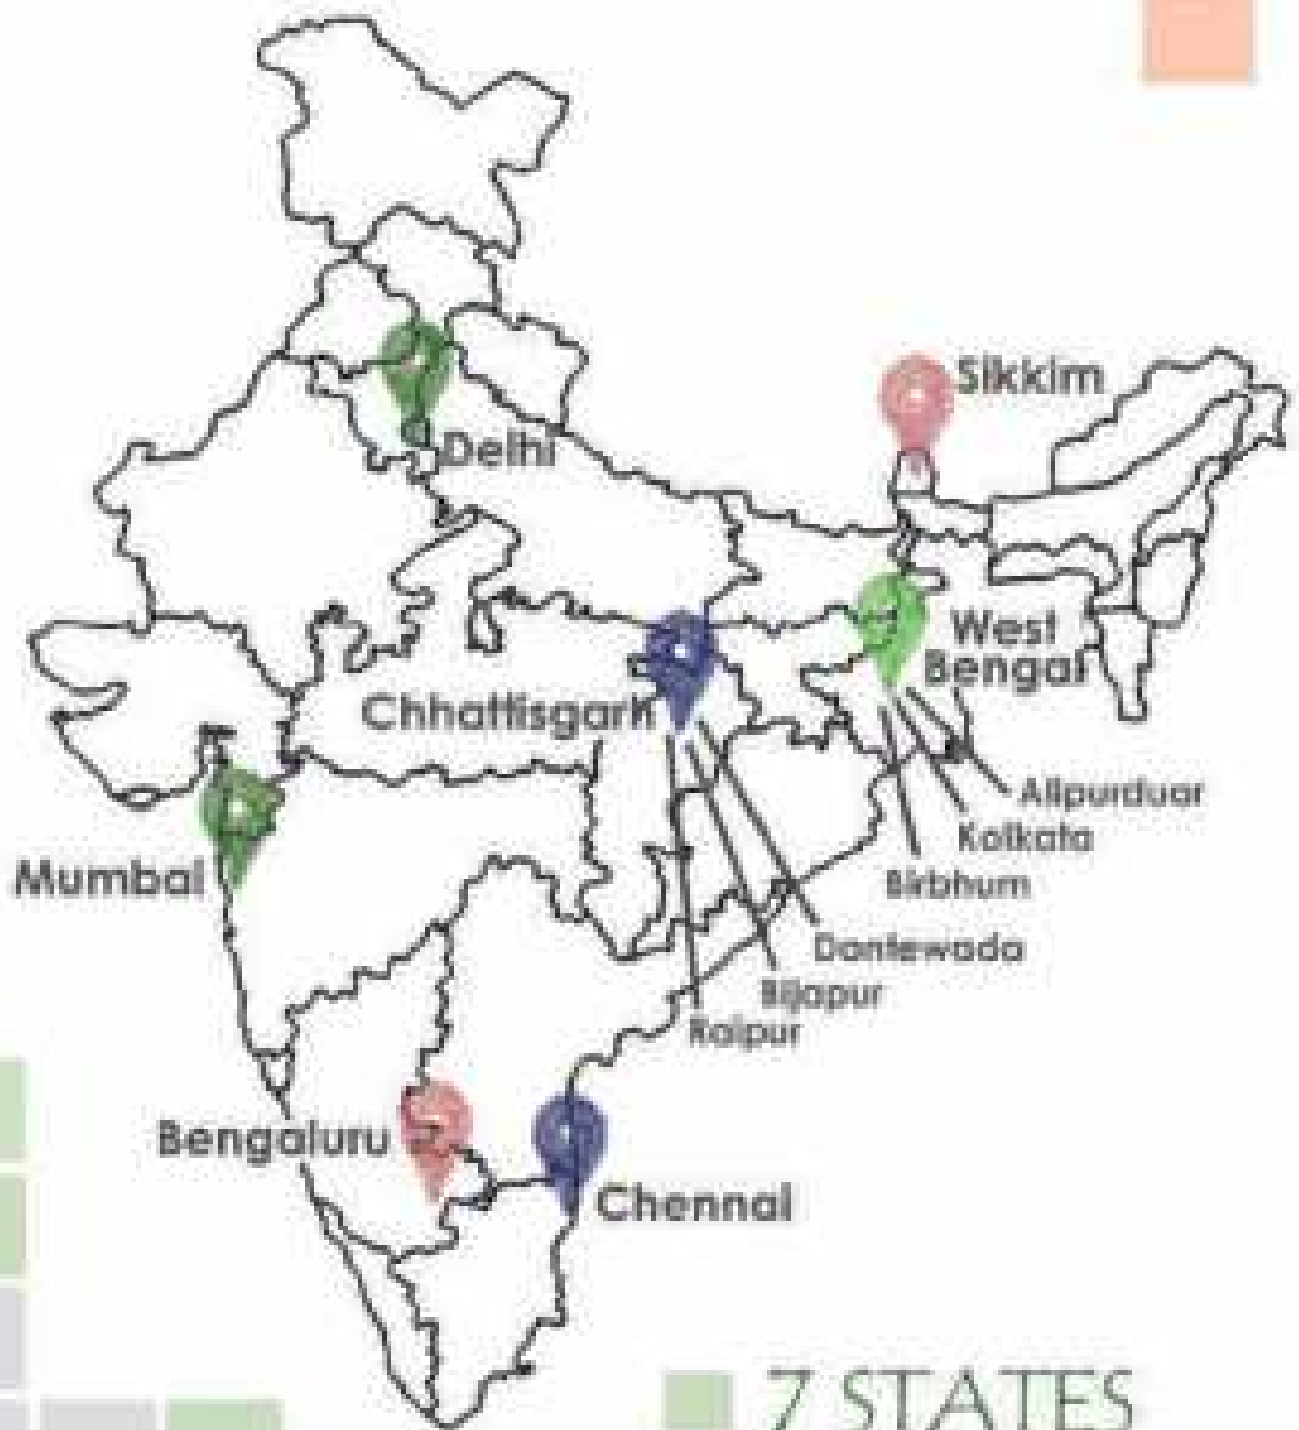

To serve as a social innovation platform that acts as a catalyst to positively impact marginalised communities and make them realise their potential through rights, protection, education and livelihood.

OUR VISION

To create an environment of active participation and protection for each child to ensure his or her sustainable development.

FOOTPRINTS

CO – FOUNDER'S' NOTE

Swarup Ghosh

The past year has seen a turn-around of our activities after the Covid period, like the phoenix rising, although the going has been slow as we saw the CSR and other funding sources cutting back. Nevertheless, we worked towards becoming more self-reliant and re-strategised project interventions to become self-sustainable.

The vision to reach out to 10 million lives by 2047 still remains on course.

The social impact spectrum is robust because of our education and skill development projects. At the same time, we are enabling beneficiaries from different projects to work for sustainable livelihoods, food security and assured incomes. The Banana, Mushroom and Moringa cultivation projects have shown a positive return on investments to the farmers themselves who are now convinced to sustain them for their own benefit. This reduces TF involvement and funding, hopefully ushering in a better financial outlook for the organisation in the coming year.

Our real primary education project, "Anandapath" has received official recognition from the District Administration of Birbhum and is now being funded by them.

This state recognition of an NGO partner's contribution is a new development in the education ecosystem of the state.

Our watershed projects, under the climate action vertical are also being successfully implemented in the Birbhum District with the District Administration taking keen interest and backing our efforts.

The Climate Change vertical is focusing on social forestry in the foothill districts of Alipurduar, Jalpaiguri and Cooch Behar in the northern part of West Bengal and also in the District of Purba.

We have ended the past year with optimism and the future looks bright, thanks to our collective resilience, holistic vision and teamwork.

We thank all our funders, the Government of West Bengal, our Governing Body and all well-wishers along with Team TF for their whole-hearted support.

Anup & Swarup Ghosh
Co-Founders
Tomorrow's Foundation.

Anup Ghosh

PRESIDENT'S NOTE

Anuradha Bhattacharjee

Head, Tom Tomorrow's Foundation.

Dear friends and well-wishers - thank you for keeping the faith and continuing to be our pillars of support. A big welcome to our new funders - thank you for believing that we are the right partners to get the job done.

As the year 2022 ended, Tomorrow's Foundation was still picking up momentum after the two-year hiatus of the Covid Pandemic (2020 - 2021). It was not an easy time, with the closing of two major CSR-funded projects (Sahaj Path and Freedom). Some hard decisions needed to be taken to trim these Projects and even, to say goodbye to a few of our staff.

Thankfully, there was the steadily expanding Agami Pathshala Project, supported by the Government of West Bengal in the tribal and marginalised areas of Birbhum. This Project followed the same model of community learning which we had implemented in Sahaj Path. Renaming Agami Pathshala as the Ananda Path Project this year, the West Bengal Government has entrusted TF with the task of scaling up further, backing the initiative with the wholehearted support of the District Administration and local Education Boards.

2023 has been exciting. We welcome the opportunities to implement projects in sectors which we had never explored before. Climate Change, Social Forestry, Watershed Management, Solar Power - these have culminated from the Shivanth Organic Farming Project. This changed traditional attitudes and practice towards agriculture and laid the foundations for Commercial Cropping, Kitchen Gardens, Food Security and Women's Livelihoods linked to the farm sector. Ticking all the right boxes in the respective SDGs, these Projects are self-sustaining and transformational.

TF's Reach d'Étre, the twin vertices of Education and Skills have developed new underpinnings and continue to operate successfully. The Enhanced Primary Learning Initiative (EPLE) now follows bridge learning through a community model in the 29 urban SSA schools of Kolkata. Skill@School and the new Project Freedom remain robust. Last but not least, our tiny Project Charabell for differently abled children has a new centre, which is redecorated, bright and cheerful. Carrying the net further, TF's overseas partner and funding arm, Calcutta de la Rue de l'École (CRE) has merged with a reputed French NGO, Planète Enfants et Développement (PED) working in the areas of Child Protection, Education, Health and Nutrition. The merged entity will now include TF as an implementing arm of PED globally, starting with geographic locations in South/South East Asia.

New horizons beckon, bringing new hope. Tomorrow's Foundation has succeeded with the hard work, commitment and dedication of all its members. Thank you. You really walk the talk. Team TF.

Anuradha Bhattacharjee
President
Tomorrow's Foundation.

EDUCATION

RURAL PRIMARY EDUCATION

PROJECT OBJECTIVE

- (i) To improve learning outcomes of students studying in grades 1-4 in 170 government primary schools for age and class appropriate levels.
- (ii) To ensure transition of primary children in the project to upper primary schools.
- (iii) To train government teachers from 170 schools on using alternative methodologies of teaching to improve learning levels of students.
- (iv) To train and build capacities of local community youth as *Solekhan Mitra* who can drive the project.
- (v) To improve community participation and advocacy in the school operational and education system.

IMPACT

30,000

14,100

15,900

CASE STUDIES

Abhishek Malik began as a 27 year old young man who graduated from Patanjali College in Bikaner. He did not have a job and his family struggled to make ends meet - so he was delighted to find employment as a *Solekhan Mitra* with IF's *Sahaj Path* project in 2002. He found his calling and became a passionate community teacher. His teaching skills, class management and community engagement were excellent and Abhishek was loved and respected in the community. When the *Sahaj Path* project closed on 31st December, 2012, the village decided to take action - and a meeting was organized with the local panchayat members and the school teacher to discuss the issue. Today, Abhishek continues to work as a community teacher to help students with remedial classes.

URBAN PRIMARY EDUCATION

PROJECT OBJECTIVE

Our urban primary education programme (Enhanced Primary Level Intervention) started in January 2018 - in Government Primary Schools in Kolkata, under the Sarva Shiksha Mission (SSM). The Primary Focus is to address learning competency gaps in terms of basic literacy and numeracy skills and to upgrade/align students to the desired mainstream competency levels. The Project has the following components: (i) In-School Intervention and Regular Evaluation, working alongside the Government teachers; (ii) Community Learning Centres, where remedial classes and interaction with parents have achieved community awareness and support to reduce drop-outs; (iii) Online Classes for further remedial assistance. A unique component of the EPLI Project is TF's Activity-Based Learning Model (developed in-house) which is accompanied by Teaching Manuals. These have been shared with the Government teachers who use them regularly.

IMPACT

4855

2751

2122

CASE STUDIES

Rinay Singh is the mother of Puja and Abhya Singh, both of whom are primary level students in the EPLI project. Rinay started to attend the community classes along with her children and gradually became involved in active class participation to help with the remedial lessons. At present, she takes part in different project activities and the workshops to make Teaching and Learning Materials (TLM). She has also successfully completed the Google Meet training and loves the Art & Craft activities. Her efforts with community advocacy have prevented drop-outs and encouraged participation by other parents in their children's studies. Rinay is one of the Project's key Facilitators and Community Influencers, not only an asset to Tomorrow's Foundation, but commended by the Government teachers for her valuable contribution.

EDUCATION & EMPLOYABILITY

PROJECT OBJECTIVE

Project Freedom started in 2020 in the slums and under-served areas of Kolkata. The primary focus was to improve the lives of young people who had dropped out of school because of their inability to cope with studies or for family difficulties which required them to earn money. Some of the targeted beneficiaries were also adolescents who had never been to school. Project activities: (i) Education through Open Schooling; (ii) Capacity building with employment-oriented skill sets that offered better job prospects; (iii) Advocacy within the community to make local employers and families aware of the need to educate children; (iv) Imparting Life Skills; (v) Creating Youth Leadership Groups and Peer Leaders to negotiate with family and social pressures.

IMPACT

CASE STUDIES

Shreya Ghoshal is 17 years old. Tamarisk's Foundation helped her continue with her studies and now she is in Class 11. Before the Class 10 board exams, Shreya did not have money to buy many of the books required for the history, geography and science courses. TF provided whatever she needed: books, reference materials and practice papers and Shreya was able to pass the board exams successfully. This bright teenager was an active peer leader in Project Freedom for 3 years. She engaged in multiple community activities and helped young children with their school work by offering tuitions. Shreya was also a vocal and determined activist against child marriage and organised advocacy meetings with parents for creating awareness. The Tamarisk Police Station acknowledged Shreya's participation as a Community Leader and rewarded her for dealing with anti-social elements in the community.

PROJECT OBJECTIVE

The Charabati Project started as a community-based intervention in 2010. The Primary focus is to provide remedial education and therapeutic interventions to children with disabilities, up to 18 years of age. Location - under-served and low-income communities from the slums of Kolkata. During the Pandemic, the physical intervention could not be sustained and an alternative mode of online classes was started, alongside training and capacity building of parents who were able to provide support to the children. The curriculum for Charabati includes: (i) Communication skills (language, vocabulary), (ii) Number skills, (iii) Recreational activities (art, singing, dancing), (iv) Craft activities (to make teaching materials, posters & wall decorations), (v) Personal skills, (vi) Occupational skills.

IMPACT

CASE STUDIES

Abha Gupta is 13 years old and an only child. She was diagnosed with congenital Intellectual Disability, with some vision impairment. After several eye surgeries which have improved her vision - Abha still needs to bring objects close to her eyes, has difficulty in gripping things and cannot handle bathing or dressing without help. Her speech is not intelligible and only her parents and special educator can understand her. The Charabati Project has given Abha hope. She has participated in the Project since 2016 and became a star performer when the online classes started during the Covid Lockdown. She now knows the names of primary colours, can write her alphabets (A-Z) and her numbers (1-10). She is a happy, engaged and active child.

CHILD PROTECTION (UTTARAN BASTAR)

PROJECT OBJECTIVE

The Uttaran Bastar Project started in 2010 in Dantewada and in 2011, in Bijapur, both in Chhattisgarh State. The Project focus is on running a residential hostel for marginalized children. The facilities offered are education, sports (football), healthcare, nutrition and community support for children who have been orphaned and are homeless, as a result of the insurgency. Between 2016-17, the hostels were registered as Children's Homes (Child Care Institutes), under the Juvenile Justice (Care & Protection) Act, 2015-16. In 2023, the Project continues to rehabilitate troubled children and provide a happy environment in which they can grow up safely and with a feeling of security. There is emphasis on counseling services, life skills training and social mainstreaming. The community plays an important role in rehabilitating the children and the Project's advocacy with elders and gatekeepers has been very successful.

CASE STUDIES

Maheesh Kuchhap is 19 years old and was born in Kerkeli, Bijapur District. He lost his father when he was very young and his mother worked as a domestic helper in different houses, leaving him alone at home. However, Maheesh loved going to school and worked hard, attracting the notice of his teachers. One of the teachers who was aware about the problems Maheesh was facing, helped to admit him to the Tomorrow's Foundation Children's Home. Maheesh has now graduated from Class 12 and enrolled in the State Police. He is a champion footballer who has played at both the State and National levels. He says with a smile, "I have become a proud citizen of the country, with the help of Tomorrow's Foundation."

S K I L L S &
L I V E L I H O O D

SKILLS@SCHOOL

PROJECT OBJECTIVE

The Skills@School Project started in 2017 and covers the same Kolkata SA schools where Tomorrow's Foundation already runs the EPL Urban Education Project at the primary level. The main focus is tackling the 'dropout' problem, which is common in all Government schools. Many children from poorer sections of society feel that they can no longer cope with their studies and leave in the middle school years (ages 12-14) to earn a living. However, an incomplete education is a severe handicap, along with their lack of suitable skills. As 'unskilled personnel' they find it difficult to find good jobs. The Skills@School Project follows the Government of India's 'New Education Policy (NEP 2020)' which has the mandate that schools provide an integrated level of Education & Skilling. The youngsters who cannot continue schooling are thus better equipped to find jobs, or engage in some form of self-employment.

CASE STUDIES

Subrata Kogekar, from Guris DPM Boys' High School in Kolkata was an enthusiastic participant in the Skills@School Robotics classes. From his childhood, he was fascinated by electronically operated toys and gadgets. When Tomorrow's Foundation introduced the Robotics Skilling Class at his school, Subrata decided to experiment with solar power. He developed a model called 'Dark Sensor', based on LDR technology. This application is an important component in automated circuit controllers and commonly used in wall clocks, street lights, wake-up alarms, etc. Subrata is now motivated to finish school and pursue higher studies at an Engineering College.

HEALTHCARE TRAINING PROGRAMME

PROJECT OBJECTIVE

Torjanna's Foundation Healthcare Project started in 2010, evolving from an earlier intervention model called *Shiksha*. The primary focus of both the SHP and Healthcare Projects is to make underprivileged youth employable through Skill Development aligned to Market Needs. While *Shiksha* concentrated on developing computer skills, TF Healthcare Project targets the booming need for trained caregivers in hospitals, nursing homes, senior citizens' resident homes and to offer patient assistance at home. This Project follows the statutory General Duty Assistant/ Home Health Aid training norms as mandated by the Government of India. The Project runs in Kolkata Municipal Area Ward 80 and some adjacent slum and low income localities.

CASE STUDIES

Komal Kuman is poor and lives with her parents and brother in the Bow Bazar locality of Kolkata. She dropped out of school because of financial constraints. Without the advantages of a completed education and inadequate social and communication skills, Komal had no confidence and no hopes about her future. After becoming a part of TF's SHP Project initially, and then moving on to the Healthcare training, Komal is now a confident and poised young woman. She has self-esteem and can talk to people as an equal. Her dream of being able to get a good job and help her family has also come true. Meet Komal now – a happy General Duty Assistant at Sohadaya, a unit of Tribeca Care. She earns Rs.8,500 a month, with Provident Fund, Health Insurance (ESI) and stays comfortably in a Working Women's Hostel with other colleagues.

PROJECT OBJECTIVE

This Project is a continuation of the earlier Tobacco Control Intervention (TCI) and runs in the same schools where Tomorrow's Foundation is engaged in the EPLI and Nalanda School Projects. The middle school years are stressful for young people, especially those without access to parental quality time and guidance. The mental and physical health problems of adolescence, the inability to stay away from the social and peer pressure to try drugs, alcohol or tobacco – these are the pitfalls that TF enables its beneficiaries to tackle successfully. The Modules cover (i) Self-Confidence, (ii) Health and Hygiene, (iii) Nutrition, (iv) Exercise, (v) Mindfulness and Well-being. During the Pandemic, the youth were also educated on how to stay safe from Covid infection.

GARDENING

Rakhi Ghosh, studies in Class 7 of Baniya Park Para High School. From her childhood, she has loved plants and created her own little garden. When she attended the Preventive Healthcare sessions, Rakhi was fascinated by the idea of Microgreens. From childhood, Rakhi was never very fond of junk food and enjoyed the simple, home-prepared meals served by her mother. Once she came to know about the health benefits of Microgreens and how to grow them at home, Rakhi started to experiment on her own. Her planting of coriander seeds and germinating gram (Chana) has shown good results and she is happy to convert the family to her fresh herbs and greens.

FOOD
SECURITY

NUTRI-GARDEN

PROJECT OBJECTIVE

The Project, started during the Pandemic in 2021, has now been renamed as the Climate Resilient Farming and Nutrition Project and continues in Lalpur Block, Birbhum District, West Bengal. The Project focuses on motivating villagers, especially women, to utilize the fallow land around their houses for growing nutritious vegetables. The knowledge gained about organic farming methods, biodiversity, rain water harvesting and the use of solar power to run the submersibles has now made these communities resilient to the uncertainties of climate change. Using organic manure has improved the quality of soil and the families feel secure about better harvests. Better nutrition is an add-on benefit along with selling the produce to get an additional source of income. These women now have a great sense of empowerment.

IMPACT

450

316

134

CASE STUDIES

Makoti Harada was a landless farmer. Before the Nutri-Garden Project, she had no idea about vegetable cultivation and never believed that she could actually try to grow nutritious vegetables for home consumption, on land that was just lying fallow and unused. On a few occasions, she had tried to grow some spinach (Palak) or Green Chilies and Onions - but the crops produced a poor harvest. Learning about organic fertilizer and pesticide products which were not chemical-based, opened Makoti's eyes to new methods. She is now delighted with the results of her farming. "Look at my crops", she exclaims with pride. "My family eats good, healthy food and I can sell some of the produce in the market to earn extra money."

BANANA CULTIVATION

PROJECT OBJECTIVE

Tanujam's Foundation Banana Cultivation Project is located in the Bishnupur District of West Bengal. It started in 2020 as a spinoff from the earlier organic farming project (Sivamit). This laid the foundation of the TF-initiated Farmer Association (Harisugam Farmer Producer Company Ltd) and has other projects which cover women's empowerment, health and well-being, along with income generation through farming (Natal Garden and Mushroom Cultivation Project). Bananas are a food staple and also a commercially lucrative horticulture product of our trade. Thus, the Primary Focus of the Banana Cultivation Project is (i) income generation (ii) Forming Market linkages (tie-up for produce off-take with Kewinter Agro Pvt. Ltd), (iii) Better Water Resource Management with the use of Solar-Powered Submersible Pumps.

IMPACT

93

93

CASE STUDIES

Normal Mondal started Banana Cultivation in 2020. He was fortunate to own a slightly larger plot of land which made it easier for TF to provide a submersible pump operated on solar power. 4000 saplings were provided by the organisation, but initially many saplings died because of pests, drought and unseasonal rainfall. Nonetheless, most flourished and grew well. Normal's initial investment of Rs 30,000 on the banana cultivation initiative is now projected to earn more than Rs 70,000 with the first sale of the crop - a level of profit which he could never imagine with his paddy cultivation. "The tie-up with Kewinter's has really helped, because they will buy all my crop," declares Normal happily.

WATER RESOURCE MANAGEMENT

PROJECT OBJECTIVE

Tomorrow's Foundation Watershed Project started in Ramnagar Block, Birbham District, West Bengal in 2022 to address a major problem faced by farmers all over the country: Water Scarcity. Crop damage from adverse weather conditions which affects livelihood and family incomes are an annual occurrence all over India, including West Bengal. The spectrum of evicted damage, depleted water tables, ground water scarcity, non-pable soil and lower farm productivity has a negative impact on farming and adds to the continuous rural poverty cycle. The Primary Focus of TF's Project is Water Resource Management. This results in (i) Livelihood creation (ii) Capacity building of women on farm and non-farm based income generation (iii) Advocacy and awareness building for community ownership of joint initiatives to make them sustainable.

IMPACT

3000

3000

CASE STUDIES

Sangita Kora is a housewife and belongs to a local Self Help Group. The family struggles with its small plot of land and the alternating problems of floods or rainfall result in frequent loss of the paddy crop. Buying food is a major burden and nutrition levels are poor. In 2022, Tomorrow's Foundation conducted an awareness programme in the community in which Sangita's SHG participated. The women were motivated to experiment with alternatives to paddy cultivation, which is highly dependent on water. One such alternative is Moringa, a highly profitable cash crop, meeting the demands of the Health and Nutraceutical industry. Sangita started Moringa Cultivation from May 2022 and earned a profit from the very first crop. The family is now assured of a regular income.

CLIMATE
COMMUNITY
BIODIVERSITY

SOCIAL FORESTRY PROJECT

TF's Social Forestry Project started in 2022 in Jhapa and Cox's Bazar, Alipadua Pancha. 10,000 hectares land have been mapped till date. Primary Focus: (i) Increase green cover for monocarbon sequestration and climate balance. (ii) Convert barren land into forestry land. (iii) Develop alternative streams of livelihood and income generation from forestry, especially Non-Timber Forest Products. The ongoing pre-project launch activities are concentrated around community mobilisation and identification of participants, land identification and demarcation, fire-laxing legalities/agreements etc. This area is under-developed and many of the local people are without jobs and also unable to get any income from the non-arable land. Most resort to some form of subsistence farming. The poverty has a prevailing impact on the health and general well-being of the communities.

ALTERNATE WETTING AND DRYING PROJECT

The Alternate Wetting and Drying practice instead of Continuous Flooding is used in irrigated lowland rice farming to save water and reduce greenhouse gas (GHG) emissions while maintaining yields. TF's AWD Project in Belduar District, West Bengal tackles one of the driest districts in the state, which is known for irregular and inadequate rainfall. In 2022, this District received only 1/3 the average annual rainfall. Single cropping of paddy using the Continuous Flooding method is the common practice throughout the district, only possible during the monsoons. The cultivable land area reduces significantly during the other seasons. The Primary Focus of the Project: (i) Work with 50,000 farmers in Belduar District over 50,000 hectares of land. Discussions are ongoing with the Agricultural Department of Belduar District for Government funding and other forms of support.

EFFICIENT COOKSTOVE PROJECT

The Efficient Cookstove project started in 2022 in Cox's Bazar, Jhapa and Alipadua districts of West Bengal. The Primary Focus: (i) To reduce the use of fuelwood by households by about 50-60% (ii) To reduce fuel wood collection time, effort and physical pain (iii) To reduce kitchen smoke, which is a major health hazard (iv) To reduce the negative effect on climate and forest through wood-burning (unofficially) foundation's goal (v) To supply Efficient Cookstoves to 30,000 households (vi) To cover about 400 villages with an average 75-100 households per village (vii) To benefit 3 districts directly and indirectly on the climate change and health fronts

FINANCIAL STATEMENT

DOMESKOV'S FOUNDATION
417, Nordervej, 5040, Vardø By, 2000, NO-2000 - 700007

Significant Accounting Policies and Notes on Accounts (Followed in forming Financial Statements for the year ended March 31st, 2023)

1. SIGNIFICANT ACCOUNTING POLICIES a. BASIS OF ACCOUNTING

If these accounts have been prepared in accordance with national and international, applicable accounting standards issued by the Institute of Chartered Accountants of Norway and related provisions of the Norwegian, 1998.

If a financial and administrative report, following standards of financial transparency is prepared and tested by the governing body of the society. This report is followed in carrying out accounting policies. The account is prepared with utmost care and in the interests of the organization.

Revenue recognition voluntary contributions

1. Voluntary contributions are non-refundable donations, which means that recipients are entitled to the use of financial resources provided donors is stated in the deed. The amounts are to be applied towards achieving the fund's purpose.

2. Voluntary contributions are received from governments, other non-governmental organizations and agencies.

3. Voluntary contributions may be subject to terms in a funding agreement prepared upon the use of the resources provided concerned funds or other resources or may be free of specific terms allowing TF to direct such resources according to its funding program established funds of regular resources.

4. With regard to contributions, TF recognizes revenue in full, including the contribution contributions at the time the agreement is signed and all associated conditions are taken in their regulations and provisions.

5. Contributions related to advance of a specified period under of cash contributions which can be used before the final completion of the contribution agreement, and are to be used by TF in three periods specified by donors.

6. Advances from voluntary contributions in advance of a) Advances of general funds to donors, liability of general funds to specific purposes, besides of general funds to other purposes and b) Advances of resources that are no longer attributable to TF following the expiry of period of contribution agreement.

7. Receipts and associated gains and losses on foreign currencies are TF does not receive the full of foreign currency contributions received according with the financial regulations and rules.

8. Revenue is recognized when it can be reliably measured, unless the follow of basic economic benefits is probable and when specific criteria have been met for each of the types of contributions described below:

a. All gifts are recognized on cash basis except a few gifts which have been accounted for on actual basis on receipt of contribution from the donor. Agreements of donor agreements. Expenditures are recognized on partial basis, in the case of a program contribution with the support of some government and other agencies, though the funds received are in the nature of program resources through order services. The same is reported as gifts in case of the restriction on the expenditure and it, unless in administrative expenses.

FINANCIAL STATEMENT

TECHNOROW'S FOUNDATION

307, Millenium, K442 Ward No. 02B, Bahara – 78007

The interest income is recognized on a time proportion basis considering the amount received and the prevailing rate of interest. The total interest income of Rs.20,000/- has accrued between 10th to 31.12.2021 and Rs.75,000/- for next FCM fund account.

Recognition of Government Grants

Government grants available to the enterprise are recognized after complying the following condition

(i) where there is reasonable assurance that the FCM will comply with the conditions attached to them, and

(ii) where such benefits have been earned by the FCM and it is reasonably certain that the ultimate collection will be made.

Recognition of expenses

Expenses are recognized to the extent of financial performance to the period to which they relate.

INTANGIBLES

(a) Property and equipment

Property and equipment is stated at cost, less accumulated depreciation and accumulated impairment losses. This includes costs that are directly attributable to the acquisition of assets and the useful process of dismantling and site restoration. When no cost is incurred as a contribution in kind, the fair value or the fair value less transaction expenses is to be used.

Property and equipment includes immovable improvements that meet the criteria for recognition as separate intangible. It includes if the intangible has conditions attached to it. The liability is reduced or reversed in the same time as the value of the asset is adjusted through depreciation or impairment.

Intangible assets are recorded at an asset's carrying amount as recognized in a separate asset only when it is probable that future economic benefits associated with the intangible flow to TE and the cost of the asset can be measured reliably. Acquire and measurement, which are not qualify for recognition, are charged to income or expense in the period during which they are incurred.

Land is not depreciated. Depreciation on other items of property and equipment is calculated using the straight line method as per Income Tax Act/1961. When part of or both of property and equipment have different useful lives and depreciation rates are ascertained for or expense items (such as components of property and equipment).

The gain or loss arising from the disposal or retirement of an item of property or equipment is the difference between the net proceeds and the carrying amount of the asset, and is recognized in other income or expense under capital or other income when the item of the asset is no longer used.

TE expenditure used to acquire, expand or improve an existing lease or licensed property, or to maintain a new physical capacity that is expected to be used for TE, is recognized as property, in-kind or intangible intangible asset and should have been completed. Intangible assets have finite life, amortized over the life span to which they are used.

Intangible assets

Separately acquired intangible assets such as software and licenses and internally developed software are stated at cost, less accumulated amortization and accumulated impairment losses. If there are future any significant costs and conditions flow.

Amortization of intangible assets is recognized to equal an amount to be used in a future date based on the useful assets. Software is amortized over period ranging from 3 to 6 years. Other rights and licenses are amortized over the shorter of the period of right granted and 3 or 6 years.
